

GEGGUS can supply its full range in spite of the corona crisis – Thanks to „Handmade in Germany“

The corona virus has shut down large swathes of the German economy and is having a severe effect on the whole world. Building sites are currently not affected by it so we can keep on working.

We can still supply our whole range, as all our materials are sourced in Germany and all our products are manufactured in Germany. This means that we can still keep to our usual delivery times of approx. five

working days. This will also stay the same in the future.

Our full measuring and laying service remains available and will not be limited in any way. We will do our best to ensure that you continue to benefit from our service team's traditional availability, reliability, quality and short response times.

New safety matting system and message mats

PLEASE KEEP YOUR DISTANCE

We should all do our best to stop viruses and bacteria from spreading. These message mats will remind customers and visitors to keep at a safe distance. The markings on the mat give clear guidance.

Dimensions approx. 85 x 250 cm. LOGOCLEAN, fully washable quality, with all-round rubber edging.

PLEASE WASH YOUR HANDS

Washing your hands often and thoroughly gives particularly good protection against infection. Remind your employees, customers and guests to wash their hands in washrooms, cleaning stations and toilets. Our #WashYourHands mats help you to remember and are both eye-catchingly colourful and a sensible reminder.

Dimensions approx. 85 x 120 cm. LOGOCLEAN, fully washable quality, with all-round rubber edging.
